

## **THERADENT Sensitive Teeth Rinse**

**UPC #'s:** 0-72959-18008-9

### **What does 1x, 3x and 6x mean?**

The 1x, 3x and 6x is homeopathic nomenclature for the potency of the active ingredients.

### **Why does the label say "alcohol free", and then benzyl alcohol is listed as an ingredient?**

The statement "alcohol free" is defined by the Food and Drug Administration to refer only to ethyl alcohol, and **THERADENT** meets the requirements of that definition. The benzyl alcohol that appears on the ingredient statement is a different kind of alcohol that is present in very small quantities as a preservative.

### **What is the expiration date for THERADENT?**

Because **THERADENT** is a homeopathic product, it is not required to carry an expiration date. However, we do monitor the physical integrity of the product for five years after the date of manufacture. If you would like to contact us and provide us with the lot number, we can tell you the date of manufacture.

### **Is THERADENT FDA approved?**

**THERADENT** is a homeopathic product and homeopathic products are permitted by FDA regulations.

### **What are the active ingredients in THERADENT?**

**THERADENT** contains the active ingredients Potassium Nitrate 6x, Calcium Acetate 1x, Potassium Phosphate 1x and Sodium Fluoride 3x.

### **What are the directions for THERADENT Sensitive Teeth Rinse?**

Vigorously swish one teaspoon of **THERADENT** Rinse between your teeth twice a day for 30 seconds then spit out. Do not swallow rinse. Be sure to read all label Directions, Uses and Warnings and follow them carefully.

### **Do I rinse with water after using THERADENT?**

No, do not rinse after using **THERADENT** as this will allow it to coat your teeth with effective medicine for continuing relief.
